

## CAPABILITIES

MODULAR STRUCTURES TO PROTECT  
AND TRAIN ASSETS AROUND THE GLOBE.

FEDERAL AND DEFENSE

CoverSix provides a wide variety of structures for protection and security. The product line features hardened structures equipped with customized threat mitigation like blast resistance, ballistic resistance and/or resistance to forced entry, as well as modular training range facilities, custom-outfitted ISO containers for use as portable storage facilities and mobile office locations. The buildings are scalable in size, and no matter where duty calls, CoverSix Shelters has a solution to keep personnel, as well as equipment and electronics, safe and secure.

**COMMON CONFIGURATIONS INCLUDE:** Blast and Ballistic Resistant viewing bunkers • Communication shelters • Debriefing rooms • Command centers • Storm shelters • Emergency management • Medical field offices • Embassy/Consulate Facilities • HATS • Blast resistant range operations • Restrooms • Kitchenettes

**HARDENED FACILITIES:** Modular buildings with proven and tested Blast, Ballistic and Forced-Entry protection. Providing a safe environment for the warfighter from the training range to theatre.

**ROBUST MODULAR BUILDINGS:** Custom designed and built modular solutions with a 30 year life expectancy. A custom outfitted building that can withstand harsh environments for any customer-specific need.

**PORTABLE OFFICE FACILITIES:** Ground Level Offices provide increase safety and convenience. Provided with HVAC, CAT 5 and phone hook-ups, Lights and theft resistant windows. Instant office space wherever it is needed.

**MODULAR TRAINING RANGE FACILITIES:** CoverSix Training Range Facilities include a variety of training structures and equipment including live-fire shooting ranges, Close Quarters Combat facilities, Viewing Bunkers, Military Operations in Urban Terrain (MOUT) facilities and Skills Houses.

**SPACE AND MISSILE SYSTEMS:** Facilities are designed to meet requirements for extreme launch environments to withstand multiple blast events over many years, including Data Centers, Control Rooms, Safety Shelters, and Storage.

**SCIF/SAPF:** A Sensitive Compartmented Information Facility (SCIF) in United States military, national security/national defense and intelligence parlance, is an enclosed area within a building that is used to process sensitive compartmented information (SCI) types of classified information. A Special Access Program Facility (SAPF) is a DoD-specific physical space that has been formally accredited in writing by the cognizant program security officer (PSO) that satisfies DoD-specific standards and criteria for generating, safeguarding, handling, discussing, and storing classified or unclassified program information, hardware, and materials.

## PAST GOVERNMENT PERFORMANCE

**Contract:** SAQMMA17F0152 (subcontractor)

**Agency:** U.S. Department of State

**Nomenclature:** Hardened Alternative Trailer System (HATS) Units

**Location:** Adana, Turkey

**Contract:** 43051 (contractor)

**Agency:** Los Alamos National Laboratory

**Nomenclature:** Design/Build Blast Resistant Control Room

**Location:** Los Alamos, NM

**Contract:** N60530-5006-PV14 (contractor)

**Agency:** U.S. Naval Air Warfare Center Weapons Division

**Nomenclature:** Hardened Range Site Control Room

**Location:** China Lake, CA
