

DESIGN/BUILD MODULAR CONSTRUCTION

FEDERAL AND DEFENSE

CoverSix is a leader in modular construction of custom facilities. Long seen as an expert in the design and manufacture of specialized modular buildings including hardened facilities, CoverSix works with owners to deliver projects including Command and Control, Security Buildings, SCIFs, Range Facilities, Temporary and Relocatable Buildings, Access Control Points, and many other protective structures for governments throughout the world.

We work with an experienced team to provide the full capabilities needed for project delivery, including site studies, engineering, design, architectural, and site preparation. This work starts with installation, and extends through commissioning and service.

Our modular construction methods allow for the structure to be fabricated inside a controlled production facility at the same time as site work is being completed. The result is high quality construction and an expedited project schedule.

Modular buildings from 50 sq. ft. to 15,000 sq. ft. can be manufactured off-site, transported to the project location and assembled. This provides all the amenities of traditional construction with the benefits of modular.
