

A CUSTOMIZABLE SOLUTION FOR
MODULAR SMALL ARMS RANGES

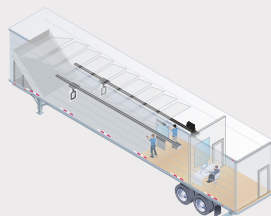

MODULAR SMALL ARMS RANGE

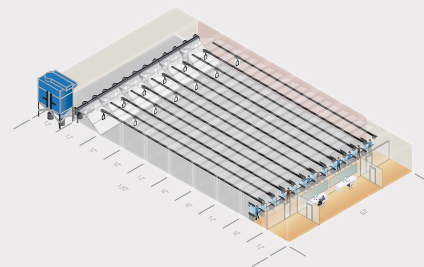

CoverSix and Action Target have teamed up to offer the ultimate solution to train and prepare warfighters and first responders for the rigors of their mission. With CoverSix's proven track record of providing customizable and scalable modular structures. Action Target's technologically advanced products to equip the range itself, our Modular Small Arms Range is personalized to meet your exacting needs and apply proven and successfully tested designs.

CONFIGURATION

The CoverSix | Action Target Modular Small Arms Range provides a completely tactical training experience. Manufactured from customized modules with 5-foot wide lanes and 8-foot ceiling heights, these ranges are fully compliant with DoD UFC 4-179-02 for Small Arms Ranges and US Air Force ETL 11-18 Small Arms Range Design and Construction. They are fully modular and scalable, available with 1 to 14 firing positions, up to 100m firing distance and with no internal columns, wall or obstructions downrange.

BALLISTIC CONTAINMENT

Safety baffles ensure errant bullets can't escape to the outside, providing ballistic protection to lights, pipes, ventilation ducts, and the building structure, while also delivering sound abatement, and a polished, professional appearance to the range. Baffles are specifically placed to provide critical coverage with ZERO surface or vertical danger zones using combinations of 1/4-inch, 3/8-inch and 1/2-inch AR500 steel on floors, ceilings and walls to safely contain small arms projectiles up to 7.62x51mm NATO M80 with maximum velocity of 1,032 m/s and 4881J.

BULLET TRAP

Our bullet traps are proven to stop bullets safely, reliably, and consistently in all conditions and for all calibers appropriate to your shooting and training needs. The industry-leading steel Vortex™ Trap decelerates bullets while and makes collection convenient. The innovative Rubber Berm Trap is clean and cost-effective, capturing projectiles whole and in-tact. Both options can be designed into any range.

TARGET SYSTEMS

The range comes equipped with your choice of Action Target's industry-leading training systems including the Genesis™ and Pilot™ target retrievers, Fixed Lateral 360 degree turning targets, DRM Pro™ Running Man System and reactive AutoTargets™. Information for these products can be found at www.actiontarget.com.

SHOOTING STALLS

We offer the most diverse shooting stalls with the highest safety ratings and most customizable options. Independent ballistic testing and advanced designs ensure that shooters stay safe and comfortable in your range. Various color options, attachable accessories, interchangeable ballistic panels, and multiple table options are available to customize your range and create the ideal shooting experience. Available options provide ballistic ratings including UL 752 Level 3, 5, 7, 8, 9, 10 and European equivalents EN1063 BR4 (S), BR5 (S).

VENTILATION

We provide the industry's best ventilation systems that exceed environmental standards. We offer a complete package of integrated controls, air filters, and maintenance to ensure that the facility and the surrounding area are protected from the health concerns associated with lead exposure and other airborne toxins found in indoor ranges. All our innovative ventilation system designs exceed NIOSH, EPA, and OSHA air quality standards, and are fully customizable to each particular rangeland installation.
